	SOFTWARE ENGINEER	08-06-2018

WHY I WILL BE AWESOME FOR YOUR TEAM:

I am a creator / inventor at heart who learned to code in order to bring my ideas to life. I am presently employed as a full stack web application developer. I am passionate about JavaScript (especially ES6 / ES2017), React, NodeJS, task automation, test driven development, IOT (internet of things), and using technology to create a better world.

I follow a continuous learning life-philosophy and can be counted on to react well to changes and learn new tech quickly. Lately I have been working with React.js, Puppeteer, NodeJS, Express, and MongoDB. I make it a point to keep up to date with rapidly evolving web standards, and I enjoy the challenge of learning a new language or framework.

Experience

Software Engineer II - CDK Global

Sep 2015 – Present

I am the lead JS developer for the Lexus team at CDK Global. I create consumable data models and turn them into beautiful Lexus websites. I evangelize test driven development (TDD) and clean code practices. I spearheaded the effort at CDK to adopt ES6 as the standard for our websites teams, and have written some tools which have decreased our development process time significantly. I act as an intern mentor and a member of the code quality panel, and am very active in code reviews.

Front End Web Developer - I-O Com

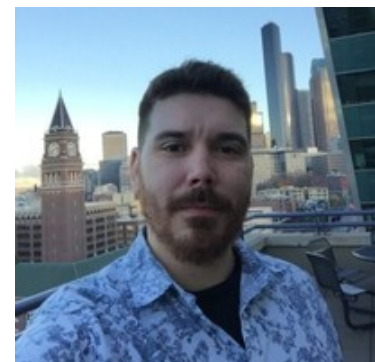

Jun 2013 – Sep 2015

I was the primary front end web developer for I/O Com. I created websites as well as online and mobile applications for car dealerships, RV dealerships, and other professional organizations.

IT Manager - Superior Maintenance Solutions

Dec 2010 – Jun 2013

I designed and developed websites across over 200 domains, created multiple company blogs, performed graphic design and reputation

Front End Engineering Design / [24](#)

management. I ran a highly successful online marketing campaign which increased inbound leads by around 25% per month. I also developed customer and vendor relations applications.

Projects

[resumeGenerator](#)

Jul 2018

This terminal utility takes a linkedIn profile url, username, and password as input and generates a beautiful pdf resume with preserved links from the on-page data. Tech used - Puppeteer, NodeJS

[Translated Bible](#)

Apr 2018

This webapp allows a user to click on any word/phrase in the bible and get a detailed translation of the original Greek / Hebrew as well as pronunciation and some data on cultural context. Tech used - ReactJS, NodeJS, Express, MongoDB

[Display CDK Data](#)

Jul 2017

A chrome plugin which automates opening CDK Global production pages on a local server, generates one-click page health reports, and reveals all kinds of useful page data at the click of a button. Tech used: JavaScript, Goggle Chrome API

[Lexus Model Pages](#)

Oct 2016

I built some stunning model showcase pages for all US Lexus dealers as part of my work with CDK Global

Volunteer Experience

Intern Mentor for CDK Global

Jun 2018 – Present

I was honored to have the opportunity to mentor our interns at CDK Global. I have found my time as an intern mentor challenging, fun, and

engaging. I found particular reward in guiding the interns to write quality JavaScript, and watching them grow as developers

Assistant Teacher for sheCodesNow

Jul 2016 – Jun 2017

I joined sheCodesNow when founder and former Co-worker Alejandra Olvera-Novack offered me the opportunity to serve as a code mentor / teachers assistant for the she codes now workshop. As the father of a little girl I am passionate about women in tech. I had a lot of fun helping with workshops and answering questions

Web Developer for A Safe Place

Nov 2013 – Nov 2013

I learned about A Safe Place <http://www.kiroradio.com/listen/9961967> in Everett WA through the Ron and Don show on 97.3 KIRO Seattle. I was moved by the efforts of this group to mitigate the effects of domestic child abuse and helped them build a donation portal and an extension of their website.
